

# Vault Overview

The Vault feature of your Wealth Management Portal allows you to safely and securely store important documents and files. This userguide will guide you through the Vault and show you how to upload files. Within your Vault there are two folders you can upload directly into. Depending on the amount of information in your Vault, we may sort the files into additional view-only folders. Most common file types are compatible with the Vault but do note that .exe (executable) files are not supported. Lastly, the individual file size limit is 30mb.

1. To begin, click the **Vault** tab from within your Wealth Management Portal.

The screenshot displays the emX Wealth Management Portal interface. The navigation menu at the top includes Home, Organizer, Goals, Spending, Investments, Vault (highlighted with a red box), and Reports. The user is logged in as Casey and Hannah, with a welcome message and their profile picture. The main dashboard features several key metrics and sections:

# Vault Overview

- The two folders you can upload files into are **My Documents** and **Shared Documents**. Use **My Documents** to store any personal files and **Shared Documents** should be used when uploading files you want to remain visible to our team.

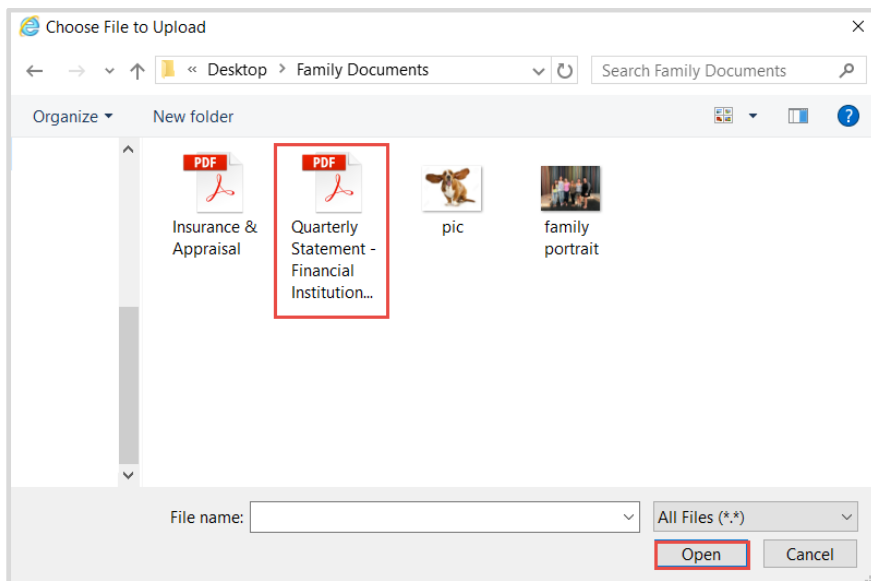

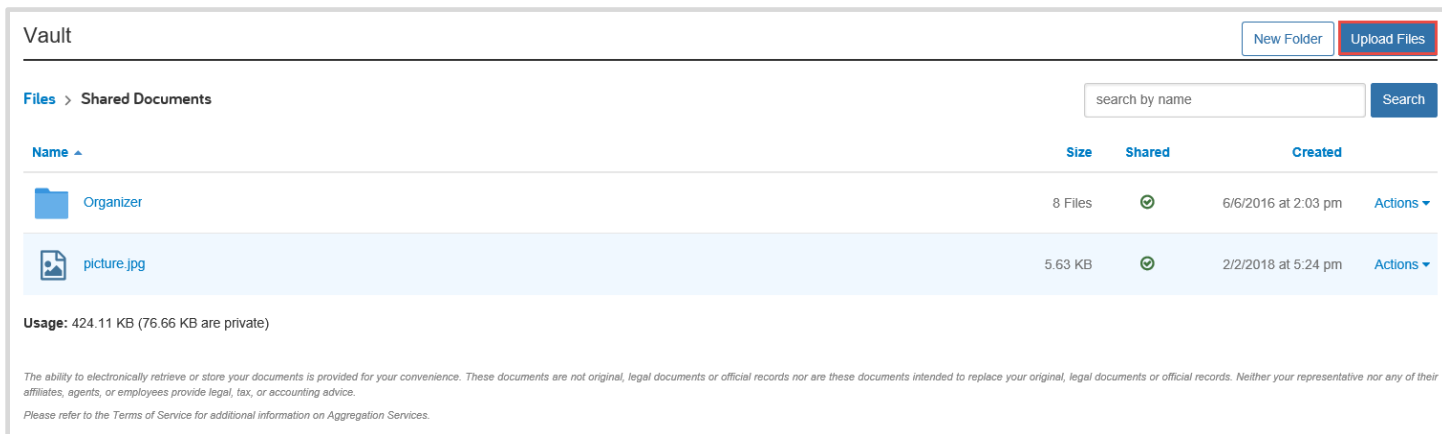

- Next, click into a folder. Within both the My Documents and Shared Documents folders, you will have the ability to create Sub-Folders using the **New Folder** button. These will allow you to further organize your files.

# Vault Overview

- To begin uploading your files, click **Upload Files**. Your browser will open a modal that allows you to pick and choose documents to upload from your desktop. Browse your desktop, select a file to upload. To select multiple, hold down the SHIFT key while selecting the files individually. When ready, click **Done**.

**Note:** each individual file cannot exceed 30mb in size.

Once files are successfully uploaded, you will see a green success message at the top of your portal.
